HYPERLUX®

791-220

792-220

HEAT LAMP

(mm)

ITEM	B	C	D	Volts	Weight (Net)
791-220	200	270	420	220V, 50Hz	6.5 kgs
792-220	200	270	420	220V, 50Hz	10.9kgs

18/10 Stainless Steel

Unique Features:

- Mirror polished or brushed 18/10 Stainless Steel construction is easy to maintain while providing an extending service life.
*Unlike brass or chrome plated lamps, the **HYPERLUX**[®] heat lamps do not dent or scratch easily with no plating to peel off.*
- Easy lamp positioning with pivoting arms and thumb screw adjustments.
- Stainless Steel lamp arms won't sag with time like flexible tubing.
- Easy to clean.
- The carving station features dual lamps, removable base and reversible marble cutting board. Also, the marble base can be chilled for cheese or dessert.
Available in 3 colors:
Black - ONYX Granite
Green - EMERALD Granite
White - WHITE Marble
- ETL & CE approved for using standard 250 watt heat lamp bulbs.
We recommend infrared lamp bulb from PHILIPS & General Electric Company
- Design patented.

HEAT LAMPS

Heat lamps are also known as infrared lamps. They use low amounts of energy, have an ability to heat quickly, and are low cost. Heat lamps or infrared lamps differ from illuminating lamps in their low filament temperature, resulting in much less light and more infrared radiation. Heat lamps are designed for use in applications specifically requiring a short-wave infrared radiation source. Heat lamps or infrared lamps are commonly supplied with either a clear, red, or inside frosted bulb. The heat is not determined by the color or finish of the lamp, however, it is determined by the wattage of the lamp.

HYPERLUX[®]

* Lamp bulb not included

* Specifications are subject to change without prior notice

* 110 Volts version also available for both Heat Lamp & Carving Station
